

# Finding success with the right lubrication program

## Mobil™ lubricants for construction

Don't let complexities in your lubrication program impact your equipment's performance and productivity. The right combination of Mobil lubricants can simplify your job, take you beyond original equipment manufacturer (OEM) warranty requirements and keep your equipment running at its best.

### We can help you:

#### Consolidate

the amount and type of lubricants used for your equipment

#### Reduce

workload with cost-effective lubricant solutions

#### Maximize

equipment uptime and extend equipment life

#### Maintain

critical path construction time and avoid liquidated damages and downtime

# Driving efficiency through consolidation

Goals and needs can change over time, so a fixed maintenance style rarely yields the best results. We can help you simplify lubrication management with our custom lubrication programs: Protect, Advance and Outperform. Find exactly which one works for you.

Please refer to the owner's handbook for OEM application requirements and oil drain intervals for your vehicle or equipment. These are simply mainline, widely applicable starting point products for consideration.

## Protect

### Offers dependable protection.

Protect provides exactly what you need for your equipment:

- Engine oil that meets OEM requirements
- Anti-wear hydraulic oils offering stability when subjected to moderate operating conditions
- Grease that enhances equipment reliability
- Heavy-duty gear oil lubricant that provides rust protection along with stability at high and low temperatures
- Transmission fluid that provides wear protection for long transmission life

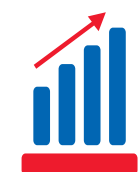

## Advance

### Helps increase equipment life and extend oil drain intervals.

Advance delivers more performance and protection for your equipment:

- Synthetic blend engine oil that delivers excellent wear protection and high-temperature performance
- High-performance, antiwear hydraulic fluid for a wide range of startup and operating temperatures with ability to consolidate viscosity grade
- Grease that enhances equipment reliability and pin life in severe operating conditions
- Heavy-duty gear oil that provides rust protection along with stability at high and low temperatures

## Outperform

### Delivers our best performance and longest equipment life.

Outperform is the ultimate Mobil lubricant offering for your equipment:

- Full synthetic engine oil that helps deliver fuel economy without sacrificing wear protection and can help extend engine life while extending oil drain intervals
- Premium anti-wear and zinc-free hydraulic oils constructed from select basestocks with proprietary additive systems. They exhibit high oxidation and thermal stability with ultra keep-clean performance; leading to better energy efficiency.
- Grease with exceptional water-washout resistance and antiwear capability to reduce maintenance costs and downtime
- Full synthetic gear oil that provides outstanding protection in severe-duty applications for longer equipment life and reduced maintenance costs
- Transmission fluid that provides maximum protection and extended operating life in the most demanding environments
