

Mobil ServSM Real Time

Live oil analysis. So the heart of your business **never misses a beat.**

When it comes to the health of your oil and machinery, time is money.

So why waste it? Stay on the pulse of your most important assets with Mobil Serv Real Time – a vital tool that monitors your lubricant health in real-time. Be empowered with instant alerts, anywhere you are, and make swift decisions to protect business efficiency.

Optimize Oil Drain Intervals

- Reduce oil consumption and total cost of operation.
- Extract the maximum value from oil before draining it.
- Use data trends to plan drain intervals and servicing in advance.

Avert costly equipment failure

- Early detection and immediate reporting.
- Prevent common causes of equipment damage.
- Deter contamination ingress, coolant leakage, and water leakage.

Boost machine productivity and safety of manpower

- Remove the hassle and risks of drawing oil samples.
- Minimize exposure of machines to contamination.
- Reduce site teams' interaction with potential hazards.

Gain a competitive edge. Continuously.

Mobil Serv Real Time is a next-gen condition monitoring tool that transforms oil maintenance with live information and actionable insights. It's a must for businesses looking to boost asset reliability, productivity, and savings through Industrial Internet of Things (IIoT) technology. Giving you peace of mind and increased uptime.

Complete insights anywhere, anytime

A cloud-based live dashboard provides analytics, automated alarms, and customizable charts – remotely and in real-time.

Early warnings to solve issues

Real-time monitoring triggers early warnings when issues start to develop, granting maintenance teams increased reaction time to stop breakdowns and major failures.

Increase asset utilization

AI and machine learning converge with historic data to give you insights and recommendations that maximize productivity.

Advance your business with Mobil Serv

Gain an advantage with our decades of lubrication expertise and innovation. Our extensive range of Mobil Serv technical services provides game-changing insights to optimize maintenance and achieve your productivity, safety, and financial goals.
