

Mobil DTE™ 20 Ultra Series

Performance you can trust.

Energy lives here™

Key benefits

Excellent deposit control
for longer oil life

Superior wear protection to extend
component life

Performance exceeding industry
standards

As an industry leader, you aim to achieve:

- Lower maintenance costs and to reduce machine interactions
- Zero breakdowns and to reduce unscheduled downtime
- Guidance from equipment builders' recommendations

Mobil DTE™ 20 Ultra is designed to help you achieve these goals effectively and efficiently.

Up to **2x**
Increase in oil life*

Cut expense on hydraulic oil
Contribute to environmental care

High performance backed by
industry's leading standard
Bosch Rexroth Fluid Rating List RDE 90245

Why hydraulic system need maintenance

Oil factors

Oil oxidises with time,
deposits are formed

Oil and filter
require replacement

Machine factors

Valves, pumps etc.
wear with age

Components require
replacement

Maintenance can be reduced by

Outstanding oxidation
stability and deposit control
of the hydraulic oil

High wear protection
offered by
the hydraulic oil

Hydraulic oil selection plays a significant role
in helping you manage your maintenance activities
and protect your equipment

* Mobil DTE 20 Ultra Series oils have demonstrated up to 2 times longer oil drain intervals versus similar competitive oils (ISO VG 46 with a viscosity index around 100 and a zinc-based anti-wear system - meeting at least ISO 11158 (L-HM) and/or DIN 51542-2 (HLP type) requirements) in demanding Mobil Hydraulic Fluid Durability (MHFD) testing.

Mobil DTE™ 20 Ultra Series

Anti-wear protection exceeding industry standards

Mobil DTE™ 20 Ultra displayed outstanding wear protection under real-time test conditions

Mobil DTE™ 20 Ultra

Other hydraulic oils

89.2%↓
sludge formation^{***}
(ASTM D 2070)

Mobil DTE 20 Ultra series demonstrates exceptional deposit control characteristics in accelerated test rigs simulating field conditions when compared with competitive oils.

Industrial Lubricants

**Advancing
Productivity™**

Safety

Extended oil drain intervals reduce safety hazards by nature and the risks associated with employee-equipment interaction.

Environmental Care†

Long oil and filter life help control your waste oil generation and maintenance related waste.

Productivity

Through outstanding oxidation and thermal stability Mobil DTE 20 Ultra Series helps extend oil life and reduce deposit formation even under harsh operating conditions and high power density.

* 74.6% lower wear than maximum limit for ring wear in Eaton 35VQ25 test, #72% lower wear than maximum limit for motor wear in BR RFT APU CL test (ISO VG 32).

** retaining plate failure caused by slipper pad damage

*** 89.2% lower sludge formation than maximum limit of ASTM D 6158 by using ASTM D 2070 method (ISO VG 68).

† Visit mobil.com/industrial to learn how certain Mobil-branded lubricants may provide benefits to help reduce environmental impact. Actual benefits will depend upon product selected, operating conditions and applications.
